Navigate to script directory

cd /user/bin

Restart command

./xds.sh -s restart

Verify service is running

./xds.sh -s status

Dependencies

Required Pre-start Dependencies

1. Service: XDSNOTIF
 - Server: xdsn04
 - Status Check: xdsnotif.sh -s status
 - Must be: Running

Log Files

- **Location:** /home/xdstrade/log
- **Log File:** xdstrade.log

Command To check if the service is ready

```
grep -i 'xdstrade is ready' xdstrade.log
```

File Locations

- **Service Scripts:** /user/bin/xds.sh
- **Log Directory:** /home/xdstrade/log

Important Notes

1. Service runs on multiple servers (xdsn01, xdsn02, xdsn03)
2. Always verify XDSNOTIF service is running on xdsn04 before starting XDSTRADE
3. Use both status command and log check to confirm service state after any start/stop/restart operation
